OUR AMBITIONS

At furnipart, we believe in creating more than just products — we create possibilities. By combining exceptional design, high quality, and a deep commitment to sustainability, we empower our customers to stay ahead and set new standards in furniture design. Design is at the heart of everything we do. Rooted in Danish design traditions but with a global perspective, we collaborate with visionary designers to craft furniture handles that shape beautiful, personal spaces. Our passion for innovation pushes us to challenge conventions, drive progress and redefine what's possible in our industry.

Great design must go beyond aesthetics — it must be built to last and contribute to something greater. That's why sustainability is not just a consideration; it's a commitment. We are on a journey to create products that not only stand the test of time but also promote a circular economy.

This means optimising resource used across our entire value chain, implementing energy and CO₂ savings within our production processes, and working with partners who share our vision for a better future. We acknowledge that full transparency across our value chain is work in progress, and we are dedicated to ongoing improvements.

We understand that sustainability is a journey without a finish line. As the world changes, so will our aspirations. Every decision we make is a step towards something greater. We will continue to challenge conventions, innovate with new materials, and refine our processes to set new standards in the industry, ensuring transparency and measurable progress in sustainability from design to production. Because we believe that true impact happens when design, quality, and responsibility go hand in hand.

This is our ambition. This is furnipart.

RASMUS BYRIEL
CEO

our sustainable journey

PROGRESS IS KEY

At furnipart, progress is key. Since 2018, we have made significant strides in integrating sustainability into key areas of our operations. We started with a clear commitment to minimising our environmental footprint. Over the years, we have strengthened our approach to responsible material sourcing and optimised production processes. We are committed to increasing circular solutions, with a target to ensure that 25% of our product volume consists of recycled materials and to provide take-back solutions in selected markets.

As we move forward, we recognize that the need for action has never been more important and we are keeping up the momentum. Our goal is clear: To continuously improve our practices and reduce our environmental impact. We make decisions today that ensure a future where sustainability is a fundamental part of our work.

2018

Cradle to Cradle™ Certification

furnipart achieves Cradle to Cradle™ certification for all aluminium profiles, ensuring minimal environmental impact and documenting the transition to a circular economy.

2020

OceanIX Series

The OceanIX series is introduced, featuring handles and knobs made from recycled plastic sourced from the maritime industry, reducing waste and CO₂ emissions.

2021

FSC Certification

FSC certification is obtained for our Wood Collection/ by furnipart, guaranteeing responsible forest management and the use of sustainable materials.

2022

Second Cradle to Cradle™ Certification

furnipart's Zamac handles in finish Inox and Matt Black are Cradle to Cradle certified, bringing 75% of our product range to bronze level.

2023

Climate Report

furnipart submits its first Climate Compass, providing a comprehensive overview of its climate impact, carbon footprint, and sustainability initiatives.

2024

Solar Energy

furnipart installs solar panels on the roof, with an expected production of 50.000 kwh, covering more than half of our electricity needs.

2025

Cradle to Cradle 4.0

Achieving Cradle to Cradle™ 4.0 certification strengthens our commitment to circular design and sustainable material choices.

From Gas to District Heating

Switching to district heating at our HQ cuts carbon emissions and improves energy efficiency.

THE ROAD AHEAD

CLIMATE CHANGE

We commit to cut carbon emissions for scope 1, 2 and 3 in alignment with the Science Based Target Initiative.

CIRCULARITY

We commit to circular solutions by increasing recycled materials to 25% of our product volume and by providing take-back solutions in selected markets.

CREDIBILITY

We commit to reach Cradle to Cradle™ Silver certification and complete Environmental Product Declarations (EPDs) covering 80% of our product volume.

SHAPING TODAY, PLANNING FOR 2027

The world is changing, and so are we. We are committed to making smarter and more responsible choices – exploring better materials, optimising our production processes, and designing for longevity. Towards 2027, we are committed to taking these efforts even further. With innovation and responsibility at the core, we will expand our use of sustainable materials, refine our processes, and uphold the highest industry standards.

MATERIALS

STATUS IN 2025

We work with OceanIX recycled plastic and FSC-certified wood.

TARGET IN 2027

By 2027, 25% of our core materials—Zamac and Aluminum—will be recycled, ensuring that a quarter of our volume comes from recycled materials.

CARBON FOOTPRINT

STATUS IN 2025

We are working towards industry-leading carbon reduction measures.

TARGET IN 2027

By 2027, we will have targets approved by the Science Based Target Initiative and ensure that 80% of our products have Environmental Product Declarations (EPDs).

CERTIFICATIONS

STATUS IN 2025

We are ISO9001 certified, and 75% of our products have achieved Cradle to Cradle® Bronze 4.0 certification.

TARGET IN 2027

By 2027, we aim to achieve ISO14001 certification and attain a Cradle to Cradle® Silver certification.

PACKAGING

STATUS IN 2025

We work with minimising the volume of our packaging.

TARGET IN 2027

By 2027, at least 50% of our packaging will be made from recycled materials.

CARING

STATUS IN 2025

We foster an inclusive workplace by employing individuals in flex jobs (for people with a reduced ability to work) and dedicate 1% of our revenue to making a impact through charitable causes.

TARGET IN 2027

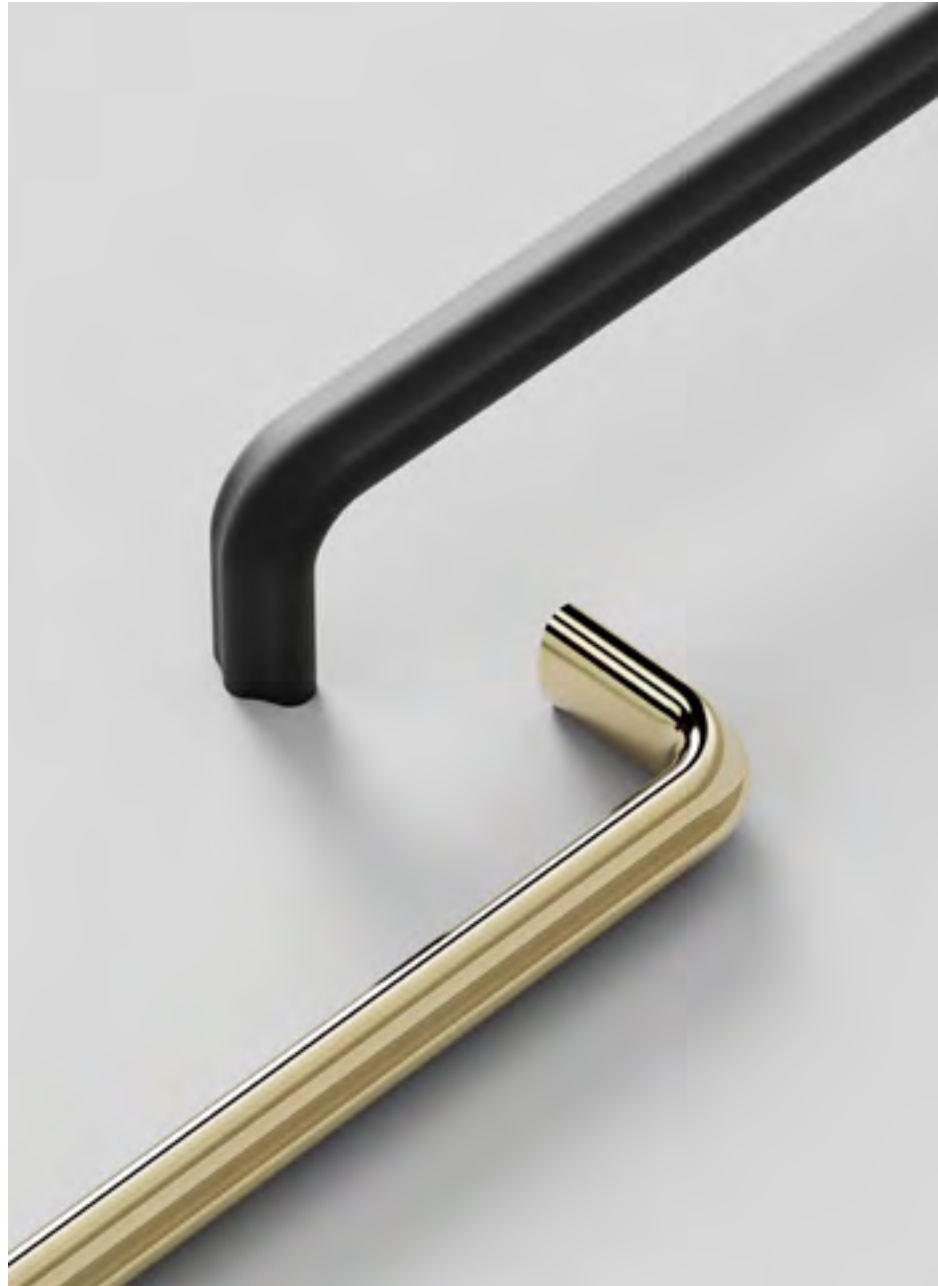

By 2027, we will build ESG-capabilities across our functions and advance Employee Engagement scores on ESG, and play an active role in our community and toward our suppliers.

handles & knobs

We are dedicated to creating beautiful handles & knobs which set the standard for years to come.

Signe Hytte

We are pleased to present our first collection of exclusive handles and knobs in collaboration with the renowned Danish designer Signe Hytte. Together, we have created two unique families that combine Signe Hytte's minimalist and modern design aesthetic with furnipart's focus on functionality and quality.

SCULTURA

Scultura series is inspired by the hand-crafted beauty of classical sculptures, as well as Greek and Roman columns that follow a steady and rhythmic pattern. The beauty of the Scultura series is that it elegantly introduces a sense of calm and quiet grandeur into our homes and everyday living.

CALLIOPE

Named after the wisest of the nine muses in Greek mythology, the Calliope collection is a testament to artistic innovation and ingenuity. Inspired by the soft, arch-like nature of concave forms, Calliope takes this shape and brings it into the functional space to challenge the idea of what a handle should feel like.

our designers

furnipart has a long tradition of collaborating with both well-established and new designers from all around the world. We take great pride in finding unique designs that fit perfectly into our collection, so when we find a new design partner, we always make a careful assessment to ensure they fit into furnipart's ethos and culture.

SIGNE HYTTE

Situated in the heart of Copenhagen, Signe Hytte Studio draws inspiration from culture and art rather than trends and technology. The studio's philosophy is to create objects, designs, and interiors that tell a story. With meticulous attention to detail, each project becomes an expression of a feeling, a dream, or an idea.

CACHÉ
Designed by Signe Hytte

Signe Hytte, formerly the design director for the Danish furniture brand &Tradition, combines an artistic vision with a commercial understanding, bringing designs to life through visual storytelling.

Signe Hytte Studio specialises in product design and creative consultancy. Drawing inspiration from timeless culture and art rather than new trends and technology, Signe Hytte creates objects and interiors that tell stories and reflect a unique dream, state of mind, or perspective.

Designed by Signe Hytte

BARTOLI DESIGN

Bartoli Design, a team comprising Anna and Paolo Bartoli, continues the experience in design developed with Carlo Bartoli (1931-2020) through many partnerships with leading companies in the furniture industry.

O-O by Rexa Design
Designed by Bartoli Design

Waters
Designed by Bartoli Design

Their research centers on elegance through simplicity and balance, blending creativity with technological and artisanal expertise for durable, sustainable, and ethical products. The studio provides design services including product design, art direction, branding, architecture, exhibitions, and interiors. Their work appears in international museums and has earned awards like the Compasso d'Oro ADI, Big See Product Design Award, Red Dot, and IF Award.

VE2

VE2 was founded in 2007 by Morten Lauritzen and Hugo Dines Schmidt. The design studio is located in Aarhus and the small team of designers are all graduates from Aarhus School of Architecture.

VE2 focuses on durable designs rooted in quality, honesty, and the ability to create both aesthetic and functional value for the user. Since its foundation, VE2 has earned widespread recognition in Denmark and internationally, collaborating with renowned brands such as Zone Denmark and Skagerak, where their refined approach continues to shape contemporary living.

RIKKE FROST

From award-winning furniture to experimental interior projects, Rikke Frost designs pieces that are not only seen but also felt and experienced. With a holistic focus on sustainability and longevity, her work reflects a passion for honest craftsmanship and future classics.

SIDEWAYS SOFA by Carl Hansen & Søn
Designed by Rikke Frost

CALEO ORIGINAL by Le Klint
Designed by Rikke Frost

With some of her designs as Sideways sofa for Carl Hansen & Søn and the Caleo lamp for Le Klint she was named the overall winner of "Danmarks næste klassiker" (Denmark's Next Classic), a Danish design competition broadcast on DR1 during 2019. She loves to combine materials and make her designs tactile, as well as give them a functional and visual dimension.

STEFFENSEN & WÜRTZ

Designers Thomas Steffensen and Pia Würtz Mogensen are the founders of design studio Steffensen & Würtz. They work with industrial design at their studio in Aalborg, Denmark.

Wine Cooler by Sackit
Designed by Steffensen & Würtz

Cana Display Series by Bolia
Designed by Steffensen & Würtz

Thomas Steffensen and Pia Würtz Mogensen both hold an MA in Industrial Design. They have collaborated with several Danish and international brands, including Bolia and German kitchen manufacturer Allmilmö and in 2023, the Wine Cooler designed for Sackit won a German Design Award.

They got off to a flying start, beginning their collaboration with furnipart in 2020, where they contributed to the successful 2020 Collection.

KAMPER FORM

Jakob Kamper is the man behind the design studio Kamper Form. He graduated as an industrial designer from Denmark's Design School (now part of The Royal Danish Academy of Fine Arts Schools of Architecture, Design and Conservation) in 2001, and his design studio is located in Ry, Denmark.

Dune
Designed by Kamper Form

Kamper Form's designs are based on the idea that form should be living, making an impression and suiting interiors both today and tomorrow. Since Jakob Kamper often works with wood, his designs have proved very popular, especially at Skagerak.

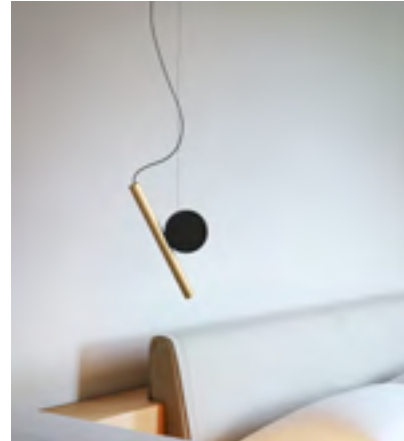

His collaboration with furnipart has resulted in numerous handles and knobs in the regular collection. One of their bestsellers, the MANOR collection, features a striking diamond pattern and an industrial look, making it a standout piece in any interior.

Geo
Designed by Kamper Form

MENEGHELLO PAOLELLI

The design studio, Meneghello Paoelli, is located in Milan and consists of two designers - Sandro Meneghello and Marco Paoelli - who combine their individual experiences to create thoughtful and engaging designs.

DOI by Luceplan
Designed by Meneghello Paoelli

© COURTESY LUCEPLAN

LAMP by Nobile rubinetteria
Designed by Meneghello Paoelli

Their collaboration with furnipart started in 2016, and despite this relatively young partnership, Meneghello Paoelli has already made a considerable impact within our collections and they have designed handles that we already consider to be 'classics'.

Meneghello Paoelli has collaborated with many brands, including Luceplan, Nobile and Ceramica Bardelli.

MEIKE NEUHAUS

A small house on the edge of the forest forms the inspiring setting for designer Meike Neuhaus' aesthetic creations. Meike Neuhaus, the founder of Neuhaus Industrial Design (2003), works best with all her versatile designs in a calm and peaceful environment.

SLIM by furnipart
Designed by Meike Neuhaus

This natural environment inspires Meike Neuhaus to create scenography for TV, trade fair stands and events, interior design, and product designs like exclusive furniture handles and machine houses for plant construction. The versatility of her work is what Meike Neuhaus values most.

With a background as a trained cabinetmaker and a degree in Industrial Design, Meike strives to create something unique. Her talent, expertise, and execution work together to ensure each design is as distinctive and characterful as the customer it's created for.

ADAM LAWS

Adam Laws is an Australian designer whose studio is located in Sydney. His creative form concepts and innovative technical design solutions have been awarded over 20 design awards.

A2, A3, A4 Capsules by Youmans Capsule
Designed by Adam Laws

His back catalogue of work includes brands such as Harley-Davidson (USA), Youmans Capsule (New Zealand) and ChessPlus (Australia). Adam Laws is often inspired by Australia's beautiful and wild nature with many of his designs for furnipart reflecting the sea.

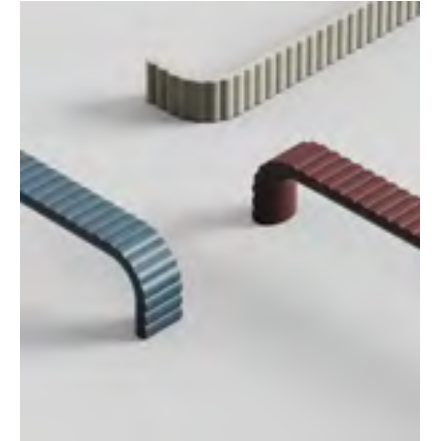

He is the designer behind EDGE STRAIGHT, a staple in our collection since 2012. The enduring popularity of EDGE STRAIGHT continues to grow, with new colors and lengths still being added today.

CHESSPLUS by Chessplus
Designed by Adam Laws

HANS SANDGREN

You will find Hans Sandgren's studio located in a beautiful old harbour front building, practically on the quay edge in the Port of Grenaa, Denmark.

LACE by furnipart
Designed by Hans Sandgren

RO Table by Naver Collection
Horse Shoe Chair by Actus Interior
Designed by Hans Sandgren

The American Shaker movement's emphasis on functionality influencing beauty is a consistent theme in Hans Sandgren Jakobsen's work, seen in furniture for the Danish Naver Collection and the Horse Shoe Chair for Japan's Actus Interior.

Hans Sandgren's designs are above all functional. In collaboration with furnipart, he has designed handles and knobs that reflect the essence of Scandinavian design, characterized by a refined minimalist philosophy of "less is more."

profile rear mounted

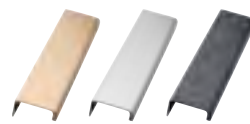

These designs have a cleaner and more simple expression than others. The level of flexibility is high and the variations many. The fine aluminum edge is visible even when the drawer or unit is closed, adding an extra detail to the design of the kitchen or furniture.

oceanix recycled plastic

If ocean plastic isn't collected and reused, new plastic production continues, driving further oil extraction. At furnipart, we took a bold step in 2018 to rethink our production, proving that sustainability and great design can go hand in hand. OceanIX transforms ocean plastic into high-quality furniture handles—not because it boosts turnover, but because it's the right thing to do.

OceanIX plastic has a CO₂ footprint that is up to 94.3% lower compared to conventional raw materials.

FROM OCEAN PLASTIC TO FURNITURE HANDLES

In the heart of West Jutland, there's a small company with a big mission: PLASTIX. This innovative company in Lemvig has developed groundbreaking technology to recycle discarded fishing nets, ropes, and other plastic waste from the maritime industry. At furnipart, we've partnered with PLASTIX to create three unique handles – Plato, Square and Volumi – made from their special OceanIX plastic granulate. In doing so, we give new life to materials that would otherwise pollute our oceans.

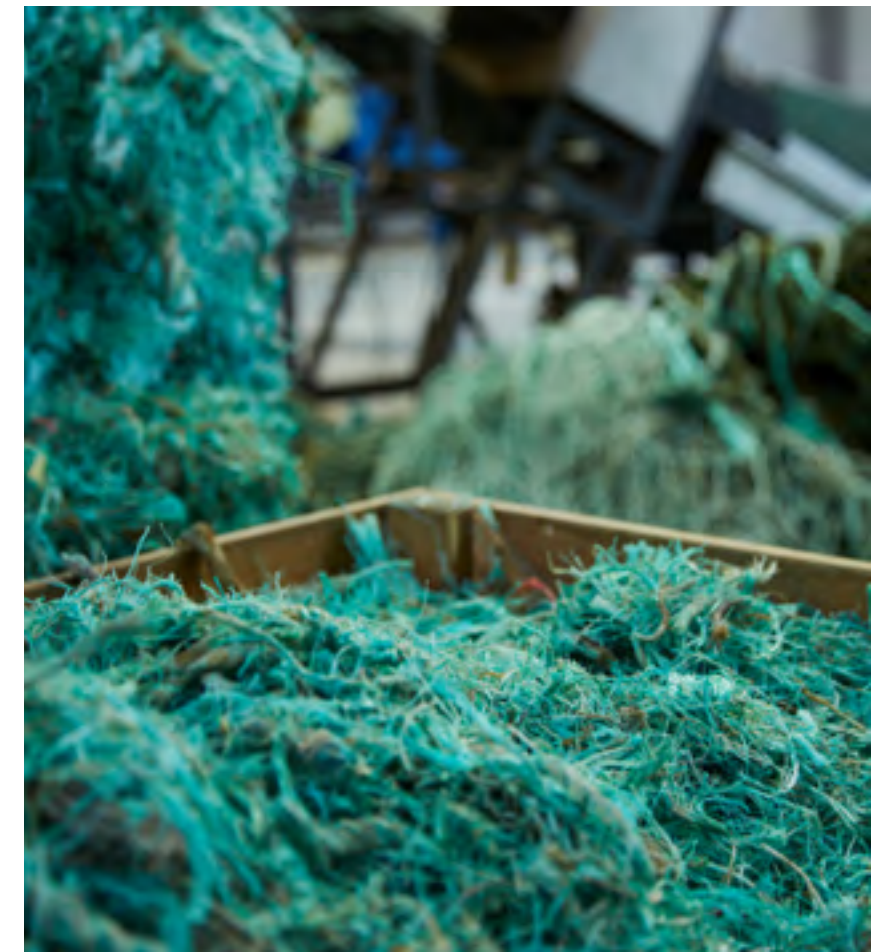

Volumi - page 162

A CIRCULAR JOURNEY

The world's oceans are under pressure due to the growing plastic crisis, with an estimated 8 million tons of plastic ending up in the sea every year – about 20 tons per minute. A significant portion of this plastic comes from poor waste management on land and discarded fishing nets and ropes from the maritime industry. This immense waste poses serious environmental challenges that threaten marine ecosystems, wildlife, and our own food chain. OceanIX addresses this by transforming collected ocean plastic into high-quality raw material. The plastic waste is thoroughly cleaned and recycled at PLASTIX, then turned into plastic granulate, which is used at our Danish factory to cast and produce our sleek handles.

AESTHETIC MEETS RESPONSIBILITY

OceanIX handles reflect our commitment to sustainability and responsible design. By recycling discarded fishing nets and maritime plastic, we reduce the need for new plastic and lower environmental impact. The production is rooted in local craftsmanship, with casting and quality control in Denmark — ensuring high quality while minimising transport-related CO2 emissions.

At furnipart, we recognise that our handles alone cannot solve the plastic crisis, but with OceanIX, we offer customers a tangible way to make a more sustainable choice. Each handle conserves resources and proves that great design and sustainability can go hand in hand—creating products that are both beautiful and kind to the planet.

Volumi - page 162

long handles

Our collection of long handles accommodates the need of handles for tall cabinets and closet doors. Emphasising the vertical lines of tall fronts, our long handles are a graphic design statement with clear functionality. These handles are not meant to be hidden, though they can be discrete.

where quality meets design

We focus on creating handles and knobs that combine lasting durability with thoughtful design. Through careful craftsmanship and consistent testing, we ensure our products remain reliable and visually appealing for years to come.

QUALITY AT EVERY STEP

Our design philosophy goes beyond functionality - it's built around a commitment to quality. We believe in designs that stand the test of time. While trends come and go, we prioritise creating products with enduring aesthetics that will continue to add value and beauty to spaces for years to come.

Every step of our production process is closely monitored to ensure precision and consistency. From sourcing our materials to final inspection, we work alongside trusted suppliers who share our dedication to excellence, ensuring that every detail meets the highest standards.

By continuously investing in the latest technology and expertise, we push the boundaries of what's possible. Our goal is not only to meet today's needs, but to stay ahead, anticipating the needs of tomorrow, delivering products designed to last and built for the future.

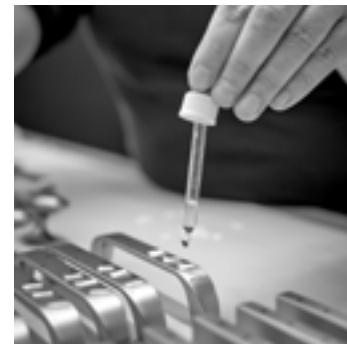

EXTENDED TESTING FOR SUPERIOR QUALITY

We take quality seriously at every stage of the process, with our products undergoing extensive testing throughout the entire production cycle, not just at the final stage. Each handle is put through rigorous testing at every stage of production, ensuring that only the highest quality products reach our customers.

CHEMICAL RESISTANCE TESTING

To guarantee durability, we subject our handles to surface tests with common kitchen chemicals like citric acid, alcohol, and acetone. This ensures our products maintain their finish even in the harshest environments.

CROSS-CUT ADHESION TESTS

To guarantee optimal performance and longevity, we perform both wet and dry cross-cut tests to assess the adhesion of lacquer to our handles. These rigorous evaluations allow us to simulate real-world conditions, ensuring that the lacquer remains firmly bonded even under moisture and wear.

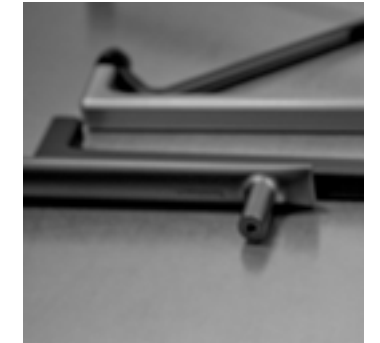

RANDOM TESTING AFTER PRODUCTION

Once a handle is approved, we randomly test items received from production to ensure consistent quality. Every shipment undergoes careful inspection to maintain our high standards.

DRILLED HOLE PRECISION

Though often overlooked, precise hole drilling is essential for proper fitting. Our quality team inspects each drilled hole to ensure seamless installation and flawless functionality.

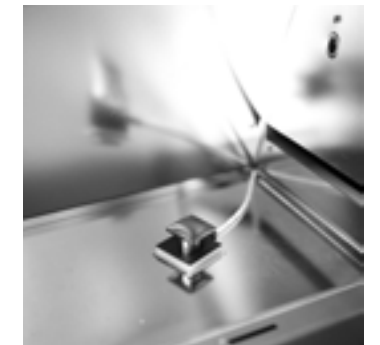

COLOUR AND GLOSS PERFECTION

Our quality control team meticulously inspects the surfaces of every handle to ensure that colour and gloss are consistently accurate. This guarantees that our products look the same, every time.

LIGHT RESISTANCE TEST

We test how long our products can withstand light exposure before the surface starts to fade. This is done by simulating sunlight with xenon light in a controlled test chamber, ensuring that our products maintain their appearance and durability over time.

STRICT STANDARDS, EVERY TIME

We never compromise on quality. furnipart is committed to delivering products that meet the highest standards, every single time. Our dedication to quality is not just a goal, but a daily practice, so our customers can rely on our products to be both durable and functional.
